ADDITIONAL INFORMATION

Projects

14/02/2023 – 28/04/2023

College Management System A College Management System is a software application it helps to manage college student and teacher data and administrative activities

- Manage the student records, including personal details, Courses, fee structure, academic history, Attendance system, and attendance records. Manage course, Teacher and Session Year.
- Creation and scheduling of classes, including assigning professors, rooms, and timings. Maintain faculty profiles, qualifications, and contact information.
- Assign professors to courses and manage their schedules. Track student attendance and generate reports for both students and faculty.
- Handle fee collection, due fees and salary paid to teacher, and scholarships. Generate invoices, receipts, and financial reports for students and administrators.
- Manage the college library, including book issue, book return, and late fee tracking.
- Enable online exam registration and result publication. Create and Manage exam schedule
- Securely store and manage question papers and answer sheets.
- Administration can communicate between student and teacher through feedback and notification..
